

1 ABSTRACT

2  
3 The present invention relates to a class of proteins, a  
4 process of production thereof, and a method for treatment of  
5 neurological and viral diseases in humans and animals. More  
6 specifically it applies to the treatment of heretofore intractable  
7 diseases such as retro-viral infections including human  
8 immunodeficiency virus (HIV), simian immunodeficiency virus (SIV),  
9 feline immunodeficiency virus (FIV), bovine immunodeficiency virus  
10 (BIV) and equine acquired immunodeficiency virus (EAIV). The
